### 1938

Dec 10/38  
1015

This year it's "Loewen's Foundation", plain or wired. We are now in a position to offer you wired foundation at only a few cents per pound more than the plain foundation. Thousands of pounds have been sold during the past few years and not a complaint has been received. Try it yourself and you will see that it is the best foundation made.

## READ THE BEST BOOKS ON MODERN BEE-CULTURE

"FIRST LESSONS IN BEEKEEPING", by C. P. Dadant, 167.. pages, 178 illustrations. Price postpaid \$ 1.00.

"A THOUSAND ANSWERS TO BEEKEEPING". By Dr. C. C. Miller. well illustrated, 276 pages, cloth bound. Price postpaid \$ 1.25.

"The DADANT SYSTEM OF BEEKEEPING", by C. P. Dadant 118 pages, 37 illustrations, cloth binding. Price postpaid \$ 1.00.

....."ABC & XYZ OF BEE CULTURE" by A. I. & E. R. Root. An encyclopaedia of 800 pages. Cloth bound. Price postpaid \$ 2.75.

If any other book is desired let us get it for you.

## **To Our Beekeeping Friends in Canada:**

We appreciate the splendid business we have had from the Beekeepers in Western Canada during the last year, and are glad to see that the beekeeping industry is still going ahead in the provinces.

Another year has gone by since our catalogue was issued, and we have sold more supplies than in any year before, which means more satisfied customers and friends. We have also added more space to our warehouse, which will enable us to give better and more prompt service.

We trust that the beekeepers will again make our firm their headquarters and if there is anything not listed in our catalogue that you require, ask us and we will see that you get what you are looking for.

**SALES TAX:** We are absorbing the 8% government sales tax on all bee supplies.

All goods are shipped F. O. B. Winnipeg.

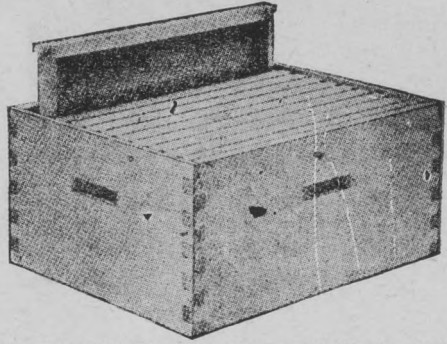

Our Terms are cash with order. Remittance should be made by draft, post office order, postal note, or express money order. If private cheques are sent, exchange must be added.

**C. T. LOEWEN**  
**Steinbach, Man.**

# BEE HIVES AND FURNISHINGS

## Standard Extracting Supers

These Supers are full depth 9-9 1/16" and carried only in the 10 frame size 15"x18 7/8" inside measure, and may be used either as hive body or super. These are supplied in three grades of Pine and one in Spruce. The best grade is made of clear white Pine, free of knots, full 7/8" thick. The next grade is also made 7/8" thick but has some solid red knots. Both of these supers above are well kiln dried. The 3rd grade of Pine is 13/16" thick which also has some knots and is well air dried.

The Spruce super is made of good air dried lumber, and dressed to 25/32" thickness.

All supers are accurately machined and great care is taken to have them just right. They are made in two different corner joints. The Lock Corner as illustrated, and the ordinary Rabbeted Corner. Metal rests and nails are included.

Jumbo supers are the same size as the standard extracting supers, but are two and one-eighth inches deeper, and are stocked only in the No. 1 Pine with Rabbeted Joints.

**LOCK CORNER SUPERS SHOULD BE NAILED AS SOON AS RECEIVED.**

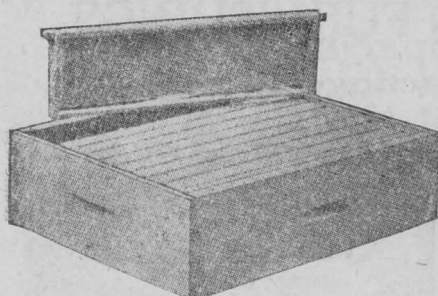

Supers are packed 5 to the bundle

		Rabbeted Joint	Lock Corner
Cat. No. 50	No. 1 Clear Pine Supers, each	65c.	70c.
No. 51	2 Pine Supers, each	39c.	44c
No. 52	3 Pine Supers, each	33c.	38c.
No. 53	Spruce Supers, each	27c.	32c.
No. 54	No. 1 Pine Jumbo Supers, each	70c.	

We have a limited supply of second grade supers in stock. These have knot and mill defects, which can be easily mended. As these supers are often sold out we cannot make shipment unless some regular stock of supers are ordered.

Cat. No. 53 A	Priced at: Spruce, each	15c.
No. 52 A	Pine, mixed grades, each	20c.

All prices in this catalogue include Sales Tax

**SHALLOW SUPERS**

## Shallow Supers

These Supers are used for extracted honey, and may be used to great advantage when honey flow is not sufficient for a deep super, and also very convenient for winter feedinf. Rabbeded corners only. Nails included.

Packed 5 to the bundle

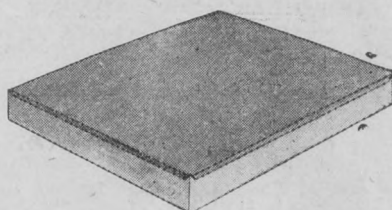

Cat. No. 54 B Pine Shallow Supers .....	30c.
No. 55 Spruce Shallow Supers .....	23c.

## Metal Covers

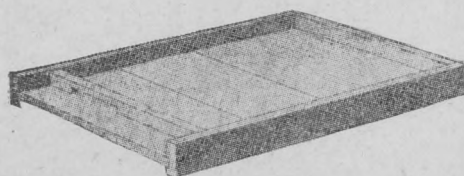

These are covered with galvanized iron, and solidly packed with insulation and will fit loosely over supers. We make these in all clear White Pine or Spruce. The Pine is by far the best Cover and will last for years. The

Spruce is a good grade of air dried lumber, and a very good Cover at this remarkably low price. Packed 5 to the bundle.

Cat. No. 57 Clear Pine Covers, each .....	60c.
No. 58 Spruce Covers, each .....	48c.

**METAL COVER**

**BOTTOM BOARD**

## Bottom Boards

Reversible Bottom Board  $\frac{3}{8}$ " and  $\frac{5}{8}$ " space. The floor is matched and glued with water resisting glue. This prevents the floor from shrinking and makes a very smooth Bottom

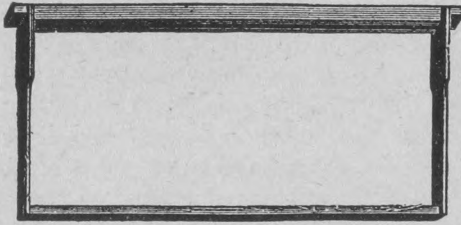

Board. It is made of No. 1 Pine side rails and Fir floor. It will last a long time. Packed 5 to a bundle.

Cat. No. 59 No. 1 Bottom Boards, each .....	48c.
No. 60 All Spruce Bottom Boards, each .....	35c.

All prices in this catalogue are subject to change without notice

All prices in this catalogue include Sales Tax

## Hoffman Self-Spacing Frames

**THE HOFFMAN SELF - SPACING  
FRAME**

in solid or split bar bottoms. Nails are included.

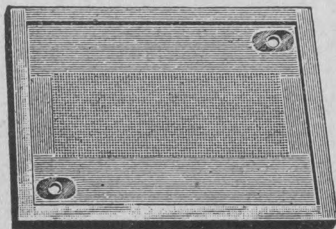

Our frames are made of the best grade of White Pine lumber available. Careful attention is given to workmanship, to insure perfect fitting. The top bars are 1-1|6"x $\frac{7}{8}$ ", with cut-out wedge for nailing in foundation. Four holes are drilled in the end bars for wiring. The frames may be had

Cat. No.	Hoffman Self Spacing Frames	per 100	per 50	less
63	1-1 6x $\frac{7}{8}$ " top bar & split bottom bar .....	\$3.85	\$2.10	41 $\frac{1}{4}$ c. ea
64	1-1 6x $\frac{7}{8}$ " top bar & solid bottom bar .....	\$3.85	\$2.10	41 $\frac{1}{4}$ c. ea
65	Shallow Frames, split bottom bars	\$3.50	\$1.85	

Eyeleted end bars supplied with any of above at 75c. per hundred extra.

We have a quantity of second grade split bottom bar frames, which have small knot defects. We can ship only a limited supply with every order of regular frames.

Cat. No. 66 Seconds - Hoffman Frames per hundred ..... **\$2.80**

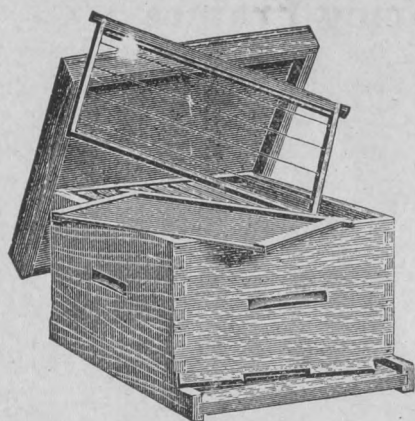

**BEE ESCAPES**

## Bee Escapes

The old reliable wire cloth Bee Escape Board still stands up the best. It will clear your supers of bees in a very short time. These are made of clear Pine, complete with two escapes as illustrated.

Cat. No. 70 Bee Escape Board, each ..... **55c.**  
 No. 71 Extra escapes for above ..... **10c.**

Save C. O. D. charges by sending remittance with your order, please

HIVE

## Complete Hives

Complete Hive consists of Metal Cover, Hive Body, Bottom Board, 10 Hoffman Frames, Entrance Reducer, and Metal Rests. All nails included.

No. 1 CLEAR PINE, each

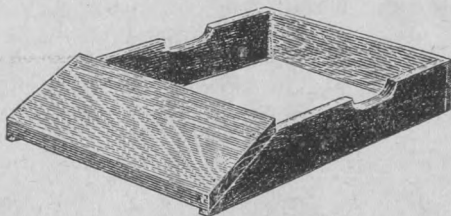

Cat.No.	Rab. joint.	Lock Corner
67	\$2.35	\$2.40

No. 3 PINE, each

Cat.No.	Rab. joint	Lock Corner
68	\$1.80	\$1.85

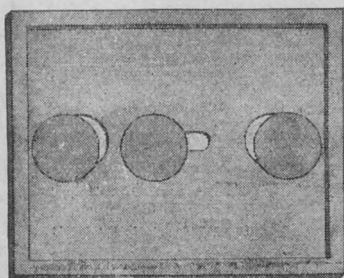

## Hive Stands

Hive Stands should always be used. To set the hive directly on the grass causes dampness and this is injurious to the bees. The Hive Stand provides an excellent alighting board, and keeps the grass from the entrance.

HIVE STAND

- Cat. No. 61 All Pine Hive Stands, each ..... 35c.  
 No. 62 All Spruce Hive Stands, each ..... 30c.

FEEDER BOARD

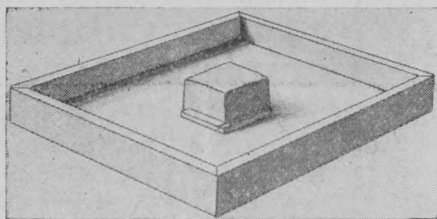

## Feeder Boards

This Feeder Board, inner cover and bee escape combination board is of great value, and used by many large beekeepers.

- Cat. No. 72 Feeder Board ..... 35c.

All prices in this catalogue include Sales Tax

THE ADAMS FEEDER

## Adams Feeder Board

Fits over the top of the hive beneath the hive cover, and holds about 30 lbs. of syrup. Adjustable size of opening for bees for fast or slow feeding. Can be refilled without disturbing the bees, simply by removing hive cover and adding syrup.

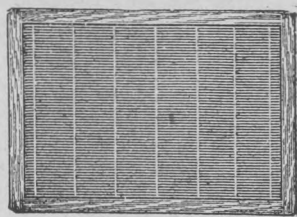

Cat. No. 73 Adams Feeder, 10 frame size, each ..... \$ 1.00

## Wire Queen Excluders

We have been manufacturing an all wire Queen Excluder, which has found a very large market and proves very satisfactory. It is wood bound and the smooth round wires make it easy for the bees to pass through; it sells at a very low price.

Packed 25 to a bundle

Cat. No. 69 Wire Queen Excluder, 60c.  
(In quantities less than 25, each 65c.)

QUEEN EXCLUDER

THE SUPERIOR VEIL

## Superior Veil

The Superior Veil is the best on the market. The strong wire cloth keeps the veil from your face in windy weather. The top fits around the hat with elastic, and the lower part is tied down around the waist, thus giving absolute protection.

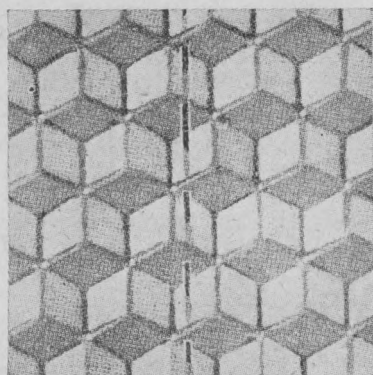

Cat. No. 87 The Superior  
Bee Veil, each ..... 90c.

Cat. No. 88 The Cloth  
Bee Veil, each ..... 50c.

All prices in this catalogue include Sales Tax

## Loewen's Plain or Wired Foundation

FOUNDATION

We have been making our own foundation for the last few years and it has proven very successful. We are offering it now to the beekeepers and assure them that it is the best foundation made. It is readily accepted by the bees. If it is once tried it is always used.

Our straight wired foundation has a big advantage over other wired foundations and that is, the wires are slightly bent so that they have a 16th inch hook which is nailed down with the wedge of the frame. This absolutely prevents the foundation to slide out of the frames.

Cat. No.	Unwired or Plain Foundation	Weight	Sheets per lb.	Price
12 L	8x16 $\frac{3}{4}$ for solid bm. bar frames	Med.	6-7	45c.
13 L	8-9 16x16 $\frac{3}{4}$ for D. Bm. bar frames	Med.	6-7	45c.
14 L	8-9 16x16 $\frac{3}{4}$ for D. Bm. bar frames	Thin	8	45c.
15 L	4-5 8x16 $\frac{3}{4}$ for shallow frames	Thin	15	45c.
16 L	4-5 8x16 $\frac{3}{4}$ for chunk or cut-up honey "		18-20	55c.
17 L	For 4 $\frac{1}{4}$ x 4 $\frac{1}{4}$ Sections	Thin	26	55c.
18 L	For 4x5 Sections	Thin	30	55c.

Cat. No.	Wired Foundation			
19 L	8-9 16x16 $\frac{3}{4}$ for D. Bm. bar frames	Med.	6-7	48c
20 L	8-1 8x16 $\frac{3}{4}$ for Single bm. bar frames	"	6-7	48c.
21 L	5x16 $\frac{3}{4}$ for ordinary shallow frames	D.Bm.	11-12	50c

Write for prices on any other sizes or large quantity.

Cat. No.	CHRYSLER'S FOUNDATION			
76	Chrysler's Wired Foundation	8-9 16x16 $\frac{1}{2}$	6-7	55c
77	Chrysler's Plain Foundation	8-9 16x16 $\frac{3}{4}$	6-7	54c
78	Chrysler's Plain Foundation	8x16 $\frac{3}{4}$	7	54c

## Wax Made Up

We will make up Customers' Beeswax in quantities not less than 10 lbs. Prices are as follows: for plain or wired foundations —

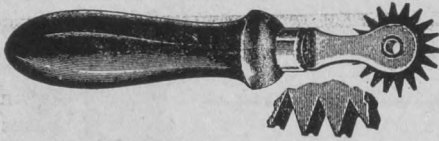

10 to 50 lbs., per lb. .... 12c.

50 lbs. or over, per lb. .... 10c.

Wired foundation —

10 to 50 lbs., per lb. .... 16c.

50 lbs. or over, per lb. .... 14c.

### THE SPUR WIRE IMBEDDER

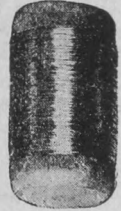

is a convenient tool for imbedding wire in foundation in frames. Rolling wheel style, wide teeth.

Cat. No. 86 Price each ..... 25c.

### Frame Wire

Specially tinned framing wire.

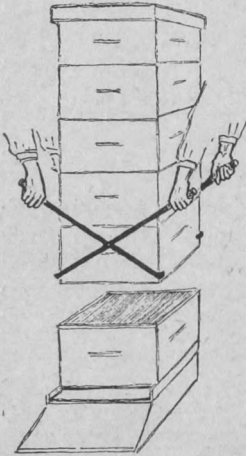

Cat. No. 80	No. 28 Gauge Wire 5 lb. Spools .....	\$1.75
No. 80 A	No. 28 Gauge Wire 1 lb. Spools .....	45c.
No. 82	No. 28 Gauge Wire ½ lb. Spools .....	28c.
No. 83	No. 28 Gauge Wire ¼ lb. Spools .....	18c.
No. 84	No. 28 Gauge Wire 5 lb. Coils .....	\$1.35

### Super Carriers

These prove very handy for examining your brood chamber. All supers may be taken off at the same time, or one at a time as convenient. This saves considerable time in examining your bees.

Cat. No. 74 Per set of two ..... \$1.75

### CRATING STAPLES

These are handy for moving bees, when fastening bottom boards and covers to hives, etc.

Cat. No. 213 1½ x ¾ per lb. .... 25c.

### Bee Brushes

BEE BRUSHES used to free combs of bees. A very necessary appliance for the Beekeeper.

Black, each ..... 40c. White, each ..... 45c.

### Hive Tool

HIVE TOOLS for loosening frames, cleaning Hives, etc. A very useful article.

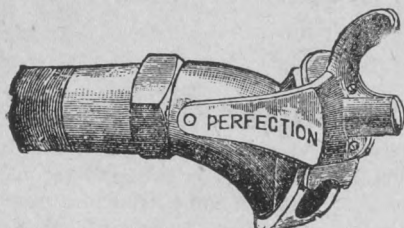

Cat. No. 92 Common Hive Tool, each ..... 25c.

HIVE TOOL

## Bee Smokers

Cat. No.	Size	Price
155	Tin fire pot 4x7"	\$ 1.25
156	Tin fire pot 4x10"	\$ 1.50
157	Copper fire pot 4x7"	\$ 1.60
158	Copper fire pot 4x10"	\$ 1.80

HONEY GATE

## Honey Gates

Large, heavy, galvanized, cast iron gates.

Cat. No.	Price
145 As on Extractor 2" ....	\$ 1.50
145 A As on Extractor 2½" .....	\$ 1.70
146 As illustrated 1½" ....	\$ 1.75

## Beekeepers' Gloves

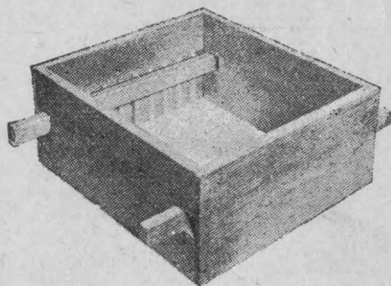

A specially prepared cloth is used for these gloves. They are sting-proof, comfortable wearing, and are fitted with rubber bands to prevent bees from crawling in.

Med. or large, per pair ..... 90c.

## Frame Nailer

This nailer holds ten Hoffman Frames, and makes frame nailing a pleasure. It holds the frames square and firm, and the can be nailed up in a few minutes. Very simple and easy to handle.

Cat. No. 214 Price each ..... \$ 1.25

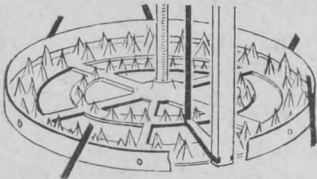

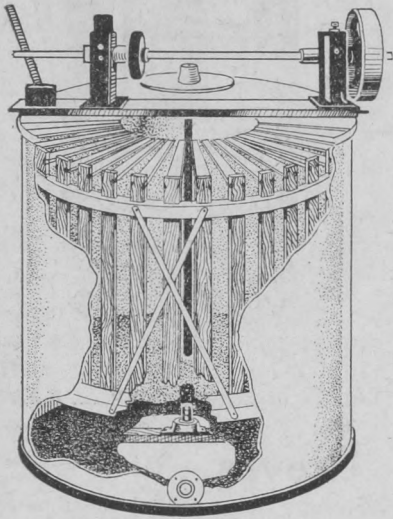

## QUEEN CLIPPING SCISSORS

Keen sharp blades for clipping the wings of Queens for indentification purpose or prevent absconding at time of swarming. Price, each ..... 60c.

All prices in this catalogue are subject to change without notice

## Radial Extractors

**RADIAL EXTRACTOR**

These extractors are for the extensive beekeeper. The frames are set in a circle at right angles to the centre shaft. Both sides of the frames are extracted at the same time without reversing or changing position of frames. The speed of the machine is controlled with a lever which makes it possible to eliminate almost entirely the breaking or damaging of combs. The bottom carrier is made of one solid piece and accurately machined, which makes it impossible to come out of alignment. The top part of the carrier is well braced and will not cause trouble as it is easily kept in adjustment. Ball bearings are used in this machine which gives ease of operation.

The extractor is now built with a steel crosspiece with a ball bearing below the bottom, doing away with the cone in the bottom. This ensures a stronger machine, entirely eliminating breaking of comb and vibrating of extractor during operation of machine. These extractors are heavily built throughout. The 20 comb may be secured in power or hand drive. The 30 comb is supplied in power drive only.

Cat. No. 100	20 Frame Hand Drive	\$ 58.00
No. 101	20 Frame Power Drive	\$ 69.00
No. 102	30 Frame Power Drive	\$ 95.00

## Storing Tanks

Our honey storage tanks are well made and strongly built from the best quality of galvanized iron. All have large size adjustable honey gates that permit easy filling of larger pails or small jars without spilling.

Cat. No. 194	23x30 — 500 lbs. with cover	\$ 4.95
No. 105	27x36 — 1000 lbs. with cover	\$ 7.30
No. 106	29x64 — 2000 lbs. with cover	\$ 12.00

Sloped bottom tanks may be had at a slightly extra charge

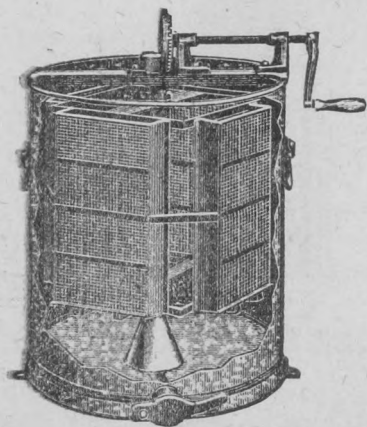

## Hand Reversible Extractors

This Extractor is very popular among the less extensive beekeepers. The baskets are hinged, making it possible to reverse the combs without removing them from the baskets. It is capable of doing more work in the same time than the non-reversible. The four frame Extractor is supplied either with or without handbrake. The brake saves considerable wear and tear on the machine and speeds up extracting. The gears are made of bronze instead of grey cast as used in most other machines.

<b>Cat. No. 95</b>	<b>2 Frame 9½x18" basket</b>	<b>\$ 19.80</b>
<b>No. 96</b>	<b>4 Frame 9½x18" basket</b>	<b>\$ 24.50</b>
<b>No. 97</b>	<b>4 Frame same as above but with brake</b>	<b>\$ 27.50</b>

## Non-Reversible Extractor

For the small beekeeper we recommend the 2 and 4 frame non-reversible Extractor. The baskets on these Extractors do not reverse, which make it necessary to reverse the combs in order to extract both sides. The 4 basket would no doubt be satisfactory for 25 or 30 colonies.

<b>Cat. No. 93</b>	<b>2 Frame 9½x18"</b>	
	<b>basket</b>	<b>\$ 18.25</b>
<b>No. 94</b>	<b>4 Frame 9½x18"</b>	
	<b>basket</b>	<b>\$ 19.50</b>

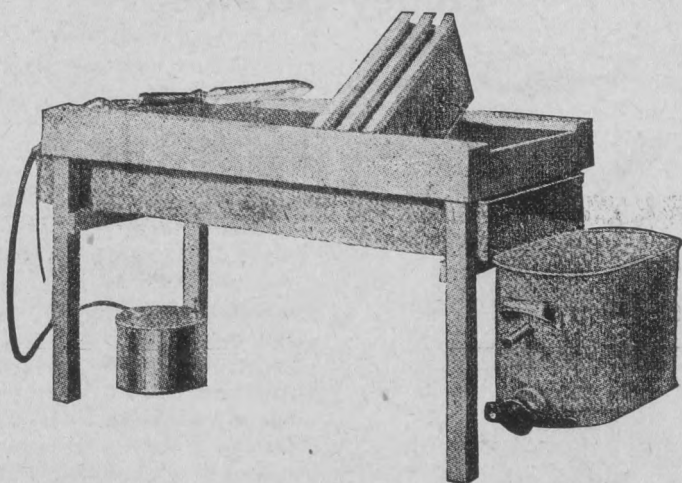

## Viking Honey Pumps

We now offer you the most satisfactory honey pump ever used by Beekeepers. It has 1 inch suction and 1 inch discharge, speed 120 R.P.M. pulley size 7½x2½", pulley speed 280 R.P.M. With tight pulley. Price each \$ 46.00 Above with tight and loose pulley & Belt shifter \$ 50.00

## Automatic Reversible Extractors

Something new in the automatic extractor. You can now swing your baskets from side to side with greater ease and without the jar you found in the ordinary automatic extractor. This new mechanism is not an attempted improvement of the old type, but a different article and is guaranteed to give satisfaction to every user. Heavier shafting and hinges are built into these machines, and the bronze gear is also used in the automatic extractor. Care is taken to ensure quality of material and workmanship in all our machines. These extractors are much speedier than the hand reversible and are recommended for the beekeeper with 60 to 100 colonies.

Cat. No. 98	4 Frame .....	\$ 42.00
No. 99	6 Frames .....	\$ 49.00

## The Peterson Cappings Melter

This is a most necessary appliance for a beekeeper who has many cappings to dispose of. It serves as an uncapping box as well. The galvanized pan with double jacketed bottom may be heated with any good coal oil stove or steam heated where steam is available.

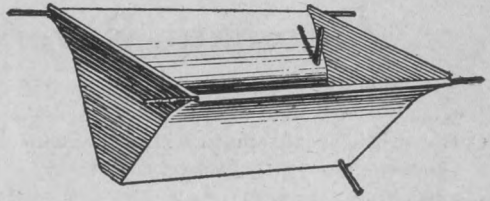

Cat. No. 159	Price of Melter .....	\$ 11.50
No. 160	A Separating Tank with Honey Gate .....	\$ 3.25

All prices in this catalogue include Sales Tax  
Save C. O. D. charges by sending remittance with your order, please

## New Cappings Melter

This melter has been found to work perfectly satisfactory and is now built stronger to stand more steam, so the work can be done faster. It takes at least 95 % of the honey out of the cappings without hurting its flavor or color. Your cappings are always cleaned up and out of the way as soon as extracting is finished. This melter does away with the expensive capping melters or driers, any beekeeper can afford it. It fits in any capping table and is guaranteed to do its work properly.

Cat. No. 171      Price each ..... \$ 4.75

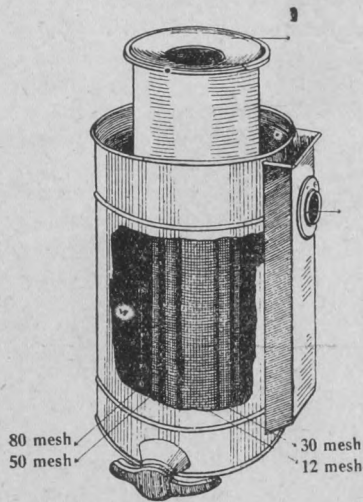

## Honey Strainer

This type of strainer — originated, tested and approved by the Ontario Agricultural College — was shown for the first time at the 1936 Beekeepers' Convention held in Toronto last fall.

Especially constructed series of four-wire screen baskets, which are made in the form of cylinders, fitting one inside the other. Each screening has the bottom made of the same size mesh as the sides, using 12- and 30- mesh tinned wire for the first two inner baskets, and 50- and 80- mesh Monel Metal screen for the two outer screens.

Tinned and Monel Metal screens are not affected by honey as much as bronze, copper or iron screen.

The 50- and 80-mesh screens, being very fragile and limp, are supported and protected by a  $\frac{1}{4}$ " galvanized mesh. The fine screen is fitted to the inside of the  $\frac{1}{4}$ " mesh, and held in place by spotting with solder. An 8" galvanized collar forms the top of each cylinder. This gives a little head space increasing the rate of flow, and cuts down the danger of over-flowing.

Our No. 207 Strainer will handle about three tons of cold honey in a day, and No. 208 will handle about six tons.

Cat. No. 207 ..... \$ 55.00

Cat. No. 208 ..... \$ 73.50

All prices in this catalogue are subject to change without notice

### CANADIAN HONEY KNIFE

Cat. No. 153      Price ..... \$ 1.10

### Canadian Honey Knife

High grade tempered steel, 11 inch blade, 1 1/4 inches wide.

### The Hardie Steam Knife

The Hardie Knife is a steam knife with a long straight blade. The feature of this knife is that the steam passes and returns through the handle.

The inside copper tubing is removable for the purpose of cleaning in case of an obstruction in circulation of steam. 11 1/2 inch blade.

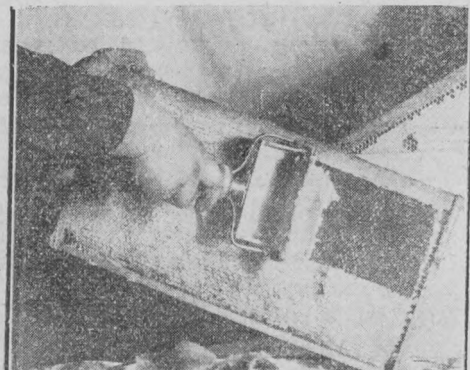

Cat. No. 154      Price ..... \$ 5.00

No. 151      Steam Hose, per foot ..... 6c.

## Rosedale Steam Uncapping Plane

After using the Rosedale Steam Uncapping Plane one beekeeper said:

"It's a splendid tool---all they claim for it and more too."

This new uncapping device has been used by large beekeepers during the past season and, without exception, has been well reported on. In use it actually planes off the cappings and can be adjusted to take a light or heavy cut, uncaps evenly and close up to the wood frame. It is heated by steam from a steam generator connected by steam hose and also requires drip hose to carry the condensation away. It is

made principally from aluminum, weighing only 12 ounces, is therefore light in weight and not tiring for the operator to use as it can be passed rapidly over the comb surface. Has a well proportioned handle giving good grip for fast work. Illustration shows the Rosedale Uncapping Plane at Work.

Beekeepers who already have a steam generator and hose can readily connect to the Steam Plane without further fittings. 1 extra copper blade supplied with each knife.

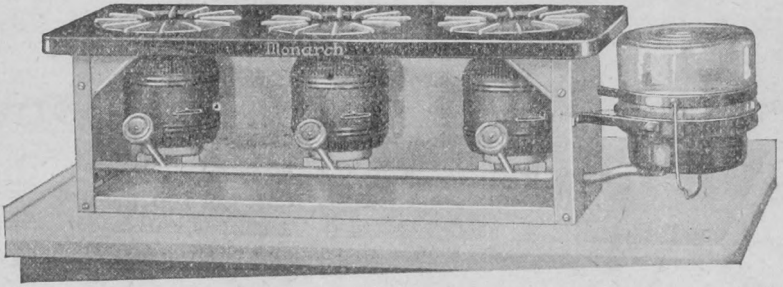

Cat. No. 206 ..... \$ 7.50

NOTE. — Price covers cost of Steam Plane only and does not include Steam Generator or hose.

All prices in this catalogue include Sales Tax

## Monarch Oil Stoves

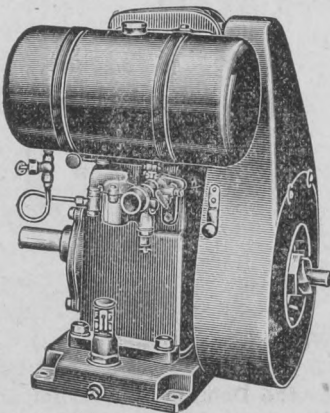

Here is an ideal oil stove for heating your cappings melter or your steamers, burns kerosene oil, safe and inexpensive to operate.

Cat. No. 209	With two burners, price, each .....	\$ 7.60
Cat. No. 210	With three burners, price, each .....	\$ 9.15

## Air Cooled Gasoline Engines

Ideal for running honey extractor or general use.

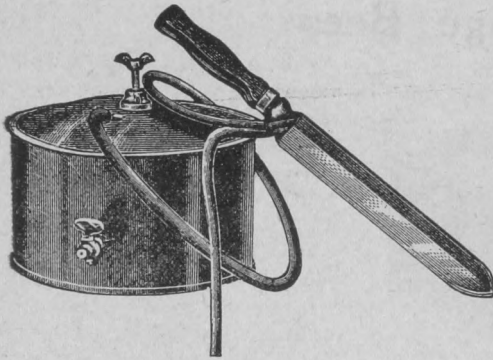

These air cooled engines over come all difficulties in connection with water freezing in block and causing at times considerable damage. The cooling is effected in these engines from the fact that large fins are on the cylinder head through which a continuous flow of air is forced from the fan type fly wheel through the air deflectors in the housing of the fly wheel. Centrifugal type governor revolving in oil which permits taking on full load with less than 5 % change in speed. Easily started with hand crank.

Cat. No. 200	½ H.P. ....	\$ 63.25	Cat. No. 203	1½ H.P. ....	\$ 92.00
No. 201	¾ H.P. ....	\$ 67.50	No. 204	2 H.P. ....	\$ 105.00
No. 202	1 H.P. ....	\$ 72.00	No. 205	3 H.P. ....	\$ 120.75

Drive pulley extra.

These engines prove to develop 20 % more Power than listed.

Save C. O. D. charges by sending remittance with your order, please

## Galvanized Steamers

1½ Gallon made of heavy material.

Cat. No. 147 Price .... \$ 1.80

3 Gallon size, same as above

Cat. No. 148 Price .... \$ 2.50

## COPPER STEAMERS

1½ Gallon made of heavy material

Cat. No. 149 Price .... \$ 3.00

3 Gallon size, same as above

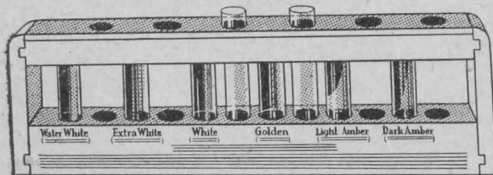

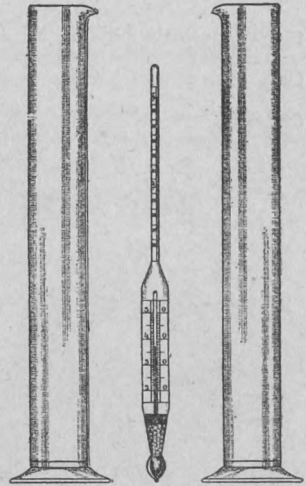

Cat. No. 150 Price .... \$ 3.75

## Honey Hydrometers

This is a device for determining the moisture content of honey. The Honey Grading Act, 1934, requires that honey belonging to Grade 1 and 2 must not contain more than 17.2% moisture and Grade 3 not more than 18.6% moisture. Price comprises complete set including Hydrometer with enclosed Thermometer, 2 Hydrometer Jars and instructions for use.

Cat. No. 211 Price, each ..... \$ 8.00

Mailing charges 25c. extra

## Honey Graders or Classifiers

We are assembling the Graders or Classifiers authorized by the Dominion Government under the Fruit and Honey Act of 1934

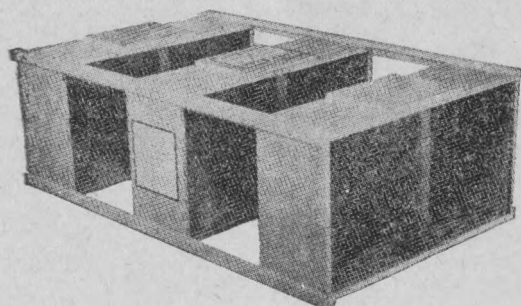

It is a Grader established as the Pfund Color Grader (six colors). The colors are permanent and will last many years, but must be protected from freezing.

Cat. No. 75 Honey Grader or Classifier complete with 2 test tubes \$ 3.75

Extra test tubes crystal clear glass, each ..... .10

Mailing weight 1½ lbs.

## Package Bees

We have arranged with an experienced southern bee yard to ship package bees for us this year. The following prices are F. O. B. South.

We strongly recommend that package bees be shipped by express to ensure safe delivery. We cannot assume any responsibility when bees are ordered to be shipped by mail.

The shipping weight of a 2-lb. package is about five pounds and a 3-lb. package about seven pounds. Prices include a young vigorous laying queen in each package.

3-lb. package Bees and Queen, each ..... \$ 3.15

2-lb. package Bees and Queen, each ..... \$ 2.45

For shipments after May 31st, prices are 50c. less on 2-lb. packages and 60c. less on 3-lb. packages.

.. Extra young laying queens, each 75c. After May 31st, each 50c. ..

No. 140	1 pint .....	45c.

Save C. O. D. charges by sending remittance with your order, please.

## Mono Honey Tubs

Made of pure spruce sulphite paper-board (odorless and tasteless), thoroughly impregnated with pure paraffin wax, attractively printed in blue and yellow, this is the most nearly perfect package to deliver honey to the user in all its original flavour and condition. It holds liquid honey indefinitely without leak or drip; the wide top makes easy filling.

Closed tightly with a waxed cardboard disc, with a wide top surface which gives ample room for stamping name and address. Firmly anchored in this lid is a small wire-pull handle which enables the user to remove and replace the lid as often as desired.

The Mono Tub enables the beekeeper to offer an attractive one-pound package at a reasonable price with a good margin of profit.

Prices on specially printed lids upon application.

**WINDOW** Available also with a clear cellophane window  $2\frac{1}{4}$ " in

**LID** diameter in the centre of the lid. Ample room is provided around the outside of the window to stamp name and address.

	Plain Lid	Window Lid
Cases of 500 (Ship. wt. — 35 lb.)	\$ 11.00	\$ 14.50
Cases of 200 (Mail. wt. — 14 lb.)	4.70	6.20
Cases of 100 (Mail. wt. — 8 lb.)	2.35	3.10
Cases of 50 (Mail. wt. — 4 lb.)	1.25.	1.65

Please order in full cases.

## Honey Containers

Stocked in  $2\frac{1}{2}$ , 5, 10, and 60 lb. sizes. As prices are not available at the time this catalogue goes to press, we will ship at going prices, or you may write for prices on containers before ordering.

### Electric Wire Imbedder

Can be used with dry cell batteries or any automobile battery.

Cat. No. 85      Price ..... \$ 1.25

# A Correction

Due to a printer's error, the size of Hoffman Self-Spacing Frames (page 4) is given as 1-1/6"x7/8"

The correct size is 1-1/16"x7/8"

## WRITE US BEFORE SHIPPING BEESWAX

When you have beeswax to offer, write us for prices. We pay the highest market price and will be glad to handle your wax for you.

Wax shipped in double burlap sacks, that is, one sack inside another, takes a lower freight rate, and in case of any loss in transit, we are in better position to make claim against the transportation company for the loss.

Do not neglect this important matter: Be sure to enclose a card with your name and address in the shipment, as well as making a notation on the outside.

Shipments of 25 pounds or less should be sent by parcel post; larger lots by express or freight, depending on the quality. In shipping old combs, always classify as beeswax refuse, which takes lower freight rate.
